PA-062866	Breach	Breach Report	National Research Council Canada	Cyber incident – Phishing		A cyber incident was detected on March 18, 2022, due to a phishing email. The incident affected multiple servers and computers on the legacy research network. Unauthorized access to the network environment occurred, including access to servers used for data/file storage. The incident was quickly detected and same-day remediation steps were put in place by SSC and NRC to prevent the spread of further malicious activity. No exfiltration of data has been detected at this time; CCCS forensic investigation is ongoing.		2022-03-22	2022-03-17
